

The space-saving PDU is easy to move and adapt to the future demands of the data center. The PDU offers superior power protection and monitoring, and the flexibility and scalability to match your actual ...

Rakworx's All-In-One cabinet is meticulously designed for peak efficiency and functionality. It includes premium features like environmental sensors, electrical systems, natural cooling, security measures, ...

Our ...

The products are widely used in ship drive, frequency conversion power supply, rail transit, aerospace, data center, smart power grid, wind power generation, industrial frequency conversion, new energy ...

Legrand offers a configure-to-order cabinet platform that offers best-in-class energy efficiency with ready-to-ship parts for shorter lead times and faster deployment. Data centers replace their IT ...

A highly engineered data center cabinet solution that delivers fast built-to-order configurability, industry-leading strength and scalability, regardless of the application.

The products are widely used in ship drive, frequency conversion ...

Our turnkey substation solutions for data centers simplify integration and speed up power delivery from grid to rack.

Today, a typical data center consumes about 3-5kW per cabinet due to power and cooling concerns, while the available cabinet space can accommodate 15kW or more per cabinet if managed effectively.

Designed for telecom, data edge, industrial, and government applications, the MOBICELL-15K eliminates the noise, emissions, and heavy logistics of diesel gensets.

These deployable, seismic and UL-rated cabinets are fully welded, pre-assembled, and come standard with features such as recessed PDU Cavities, and are configurable with or without doors, sides and ...

Find everything you need for your next adventure in our selection of modular battery cabinet for substations 15kw - warranty!
