

580 Photovoltaic panel specifications and dimensions

Improved light trapping and current collection technology enhance module power output and reliability. Better temperature coefficient half-cell design. Values at Standard Test Conditions STC (Air Mass AM 1.5, ...

With a super strong frame design accounting for 10% increased strength and a system voltage of 1500V, this solar panel ensures stability, reliability, and efficiency for long-term energy ...

Discover the JA Solar N-type 580W Bifacial Solar Panel JAM72D40-580/MB, a high-performance and efficient solar panel that captures sunlight from both sides, maximizing energy generation.

Designed for 1500V system architectures, this panel supports longer string lengths and improved balance-of-system efficiency, helping reduce overall project costs on larger installations.
