

610wp monocrystalline silicon double glass module

Half-cell bifacial double glass solar panel designed for large free-field and large commercial rooftop photovoltaic systems, optimized for long-term reliability and performance.

The NBJE610 double-glass module features 132 half-cut solar cells based on G2 wafers and a 16-busbar design. It features a power conversion efficiency of 22.58% and a power output of ...

BIFACIAL DOUBLE GLASS MODULE Worldwide Standard N-TYPE Technology M10 N-Monocrystalline silicon with silicon nitride layers for higher reliability

Utilizing monocrystalline PERC technology and a bifacial dual-glass design, this panel captures up to 30% additional energy from the rear side, significantly increasing overall power generation.

Excellent Anti-PID performance guarantee via optimized mass-production process and materials control. Module power increases 5-25% generally, bringing significantly lower LCOE and higher IRR. The N ...

Based on 210mm silicon wafer and 120 half-cut mono-crystalline PERC 12BB solar cell, the Evo 6 Series photovoltaic panels comes with several innovative design features allowing higher output power up ...

Mechanical Parameters Cell Type Module Size Glass Thickness Module Weight Output Cable Connector Junction Box Frame N Type 2465#215;1134#215;35mm 2.0mm 34.3Kg 4mm², cable length ...

Detailed profile including pictures, certification details and manufacturer PDF.
