

# Abu Dhabi Industrial Energy Storage Cabinet Cooperation Model

Does the UAE have energy storage systems in the GCC region?

The UAE has installed most of the energy storage systems in the GCC region. In 2016, Abu Dhabi Water & Electricity Authority announced the deployment of around 108 MW of sodium-sulfur-based BESS with an individual capacity of around 4 MW and 8 MW at different locations to support their distribution network.

What is the potential for energy storage in Saudi Arabia?

The potential for energy storage in the Kingdom of Saudi Arabia (KSA) is significant, given the country's abundant resources and growing demand for energy. With a rapidly expanding population and economy, KSA is facing increasing energy demand.

How to improve air quality in Abu Dhabi?

Electrification: Pursue increased electrification of transport and industry to reduce CO<sub>2</sub> and wider GHG emissions to improve the air quality in Abu Dhabi. Solar Power: Pursue deployment of solar power generation to support a cost effective and sustainable future.

How can governments support energy storage development in the GCC region?

The governments in the GCC region could collaborate with energy storage developers to introduce favorable regulations and provide capital investments to support the development of a utility-scale energy storage market and eliminate the financing risk and uncertainty factor for the projects by providing long-term contracts through auctions.
