

# Analysis of photovoltaic panel theft cases

How much does a solar theft cost?

Strecke says European solar thefts typically cause EUR60,000 (\$63,900) of damage, when repairs and loss of business are factored in. "Solar crime is on the increase," says Rachael Oakley, director of crime intelligence at Telford-based DeterTech, formally known as SmartWater Group thanks to its product-marking technology.

Is there a rise in solar theft in 2021 & 2022?

Cable theft Taylor, presenting at a Solar Crime Open Day event organized by site security company DeterTech and London-based asset manager Schroders, reported a 48% rise in cabling and solar panel theft from solar sites between 2021 and 2022.

Are solar panels being stolen in the UK?

That figure - reported by Detective Superintendent James Taylor, head of UK serious organized acquisitive crime unit Opal - included a rise in small-scale theft of solar panels as rising energy bills and the cost-of-living crisis bite. And the UK experience is far from unique.

How many solar panels can a thief remove?

Viamon's Strecke says organized raiders typically remove 100 panels to 300 solar panels - 10 tons' worth at the top end. In one case, he adds, thieves removed more than 15,000 panels - 5 MW of generation capacity - in one weekend. "It is organized crime, with big logistics in the background," he says.

The Cost of Solar Panel Theft The financial implications of solar theft can be devastating. In the Fresno County case, though only \$75,240.00 of equipment was stolen, the damage was ...

According to the International Energy Agency (IEA), global solar photovoltaic (PV) capacity has been growing at an average annual rate of around 33% over the past decade. This ...

Several instances of solar panel theft have been reported, including an incident at Gateshead International stadium as well as a larger incident in 2021 in which 221 solar panels were stolen from ...

The Cost of Solar Panel Theft The financial implications of solar theft can be devastating. In the Fresno County case, though only \$75,240.00 of ...

Cable theft Taylor, presenting at a Solar Crime Open Day event organized by site security company DeterTech and London-based asset manager Schroders, reported a 48% rise in cabling ...

A rise in solar crime means eco-conscious homeowners and farmers who have diversified into renewables should check their security and insurance. The warning comes after police figures ...

In this chapter, four case studies related to solar PV energy are presented and analyzed. The first case study discusses the solar irradiance and PV characteristics including sun's location, tilt angle, ...

# Analysis of photovoltaic panel theft cases

Theft of solar panels is a common problem that has been encountered in the field in certain contexts. This has the likelihood of compromising the sustainability of this technology and erroneously eroding ...

At present, few researchers around the world have made in-depth exploration into the detection of photovoltaic power theft. The traditional detection method mainly uses terminal ...

In one case, he adds, thieves removed more than 15,000 panels - 5 MW of generation capacity - in one weekend. "It is organized crime, with big logistics in the background," he says.

Viamon's Strecke says organized raiders typically remove 100 panels to 300 solar panels- 10 tons" worth at the top end. In one case, he adds, thieves removed more than 15,000 panels - 5 MW ...
