The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Find a list of solar photovoltaic plants that are currently considered the largest on the globe. We have listed the ground-mounted utility-scale stations, which have already been connected to the power grid and are currently ...

Data and information about power plants and their location across the globe, plotted on an Interactive world map

Top biggest solar PV stations in the United States 2024. PV parks, PV farms. (Updated September 2024) Get familiar with our list of the largest US-based solar photovoltaic plants with a capacity accounting for hundreds ...

The following is a list of photovoltaic power stations that are larger than 500 megawatts (MW) in current net capacity. Most are individual photovoltaic power stations, but some are groups of co-located plants owned by different independent power producers and with separate transformer connections to the grid. Wiki-Solar reports total global capacity of utility-scale photovoltaic plants to be some 96 GWAC which generated 1....

Solar power stations aren't just sci-fi fantasies--they're real, they're massive, and they're multiplying faster than TikTok trends. Let's cut to the chase: Yes, solar power stations exist globally, and their impact is rewriting ...

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions. These...

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 MW) solar PV data.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Interactive map of solar farms in the US. View the largest projects, track new developments, and explore capacity data across all states.
