In the 2024-2025 Federal Budget, the Australian Government announced the Battery Breakthrough Initiative with \$500 million of funding to promote the development of battery manufacturing capabilities in Australia.

Building this industry now will ensure Australia can develop and access the newest battery technologies, securing the economy and helping protect against potential market shocks. Demand for battery recycling is ...

The new cohort represents a comprehensive cross-section of Australia's emerging battery value chain -- combining materials science, manufacturing innovation, and large-scale applications that connect ...

We're driving innovation across the battery value chain - from materials discovery to cell design and battery system assembly - helping Australia build a sovereign and sustainable energy storage industry.

Australian made battery technology is already powering production here and around the world. The following products and services are ready right now to play their part in Australia's transition.

Australia's first National Battery Strategy sets out how the country will build and sustain a thriving battery industry. The strategy outlines how Australia can help diversify global battery supply chains by ...

The industry focuses on key technologies such as lithium-ion, flow batteries, and emerging lithium-sulphur chemistry. Its core activities range from producing critical battery materials to assembling battery packs for ...

A wave of innovation and advanced energy technologies played a decisive role in enabling the National Electricity Market (NEM) to operate reliably at unprecedented levels of clean power penetration. At ...
