

Brick factory transforms into solar power generation

Mitrex, a Canadian solar technology manufacturer, is launching Solar Brick--a solar-integrated facade solution designed for use as brick wall cladding that transforms a building into a renewable power plant.

Sanders Place by NMBW Architecture Studio transforms a 1970s brick factory into an energy-positive co-working hub. Through adaptive reuse, solar power, landscaped courtyards,...

Mitrex's newest project features an installation of their Solar Brick made to match the existing brick facade on the post-war era building.

Solar-integrated masonry represents brick-like solar panels that transform regular walls into power generators, maintaining the appearance of traditional masonry brick while housing embedded solar modules.

Mitrex is launching the Solar Brick - a solar-integrated facade solution designed for use as brick wall cladding that transforms a building into a renewable power plant.

Canadian solar technology manufacturer Mitrex is launching Solar Brick--a solar-integrated facade solution designed for use as brick wall cladding that transforms a building into a renewable power plant.

Canadian solar technology manufacturer, Mitrex, has launched brick-like solar panels that can transform regular walls into power generators. The product, dubbed Solar Brick, boasts up to 330w per panel ...

The brick comprises a glass structure with integrated photovoltaic cells that convert solar radiation into electrical energy. The photovoltaic cells are integrated into the glass structure, enabling both passive ...

Canadian solar technology manufacturer, Mitrex, has launched brick-like solar panels that can transform regular walls into power generators. The product, dubbed Solar Brick, boasts up to 330w per panel while creating a ...
