

Bulgaria Looking for Wind Power and solar Energy Storage Projects

The RESTORE programme aims to help Bulgaria increase its share of wind and solar in the electricity mix while maintaining grid stability and security. Storage projects will be connected to ...

The tender was launched last year, aiming to significantly increase the share of renewable energy, mainly wind and solar, in the country's energy mix. It would also contribute to ...

The recent sharp increase in solar photovoltaic capacity and the expected increase of wind power capacity in Bulgaria will require a fast increase in energy storage facilities to avoid grid ...

The national energy strategy (2023 draft) envisages that by 2050 Bulgaria will have 11.8 GW of PV, 5 GW of onshore wind, 3.3 GW of offshore wind, and 2.3 GW of energy storage capacities in operation.

The BG-RRP-4.032 tender will support new solar and/or wind power projects with co-located energy storage facilities. A budget of BGN 107.57 million (\$60 million) has been allocated to ...

Under the RESTORE initiative, launched through Bulgaria's National Recovery and Resilience Plan (NRRP), the Ministry of Energy has selected 82 projects that will collectively receive ...

The newly announced projects will help achieve this, providing an estimated 3 gigawatts of renewable energy and 1.2 gigawatts of energy storage. The projects will focus on solar and wind power, as well ...

The increased interest in the renewables sector has also been fuelled by the launch of the first auction procedures in Bulgaria to support renewable projects co-located with storage ...

Under two calls in Bulgaria, developers of 249 projects will receive EUR 268 million in total state aid. The programs are for renewable electricity plants with energy storage units. The Bulgarian ...

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...
