

a vibrant area of interdisciplinary research. The SAC Smart Grid Communications Symposium serves as a platform for academic and industry experts to collaborate, share innovations, and discuss cutting ...

This collection includes an extended version of high-quality papers selected from The International Conference on Electrical Sciences and Technologies in Maghreb conference.

Session Focus: This special session aims to bring together researchers, academicians, and industry professionals to explore cutting edge developments in the control of power electronics converters...

Submission of abstract or full papers - November 10, 2024 Submission of abstract, extended abstract or full paper - NEW deadline: January 21 2025 Convened sessions, tutorials and ...

This Special Issue seeks original, high-quality research contributions that advance DL methodologies and their application to the secure, reliable, and responsive operation of smart grids, with particular ...

Discover verified academic conferences, journals, and workshops in { microgrids}. CFP -- The verified ecosystem for academic events and calls for papers. Stay updated with global { microgrids} research ...

Call for Papers for the Special Session on Power-Electronic-Enabled Control and Market-Oriented Operation of Smart Microgrids: Optimization, Demand Response, and Peer-to-Peer Energy Trading

Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the special issue website. Research articles, review articles as well as short ...

The study reviews various intelligent protection schemes implemented in AC, DC, and AC/DC hybrid microgrids, categorizing them based on their decision-making modules, outlining their ...

This Collection calls for submissions of original research into methods that support the deployment of smart grids, driving progress in energy management, grid reliability, and the ...
