

A vast field of solar panels, fixed to steel trusses in shallow water, has become the world's first gigawatt scale open sea photovoltaic farm and a test bed for how to run a modern grid on ...

China Three Gorges (CTG) launched tendering for the Kubuqi Desert (central-northern Ordos) new energy base: 8 GW of PV and 4 GW of wind paired with 5 GWh of storage, with total ...

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry experts and ...

Last year, a viral drone video from China's Guizhou province revealed an entire mountain range blanketed in solar panels stretching to the horizon. It's a stunning visual, but it doesn't even...

China's solar power capacity is on course to surpass coal this year A sunset glow lights up wind turbines and rows of solar panels at a wind farm in Qingyang, Gansu province, China.

Chinese Generation Capacity Additions by Source In 2024, solar contributed 267 GWac (309-357 GWdc), or 64% of new generation capacity, in China, and cumulative solar capacity ...

China's solar panel installations surged in the first half of the year as developers sought to complete projects before the new policy, which removed a guaranteed rate of return, took...

In Jiangsu's Wuxi, China's first industrial park dedicated to perovskite PV -- an emerging solar technology -- recently opened. Perovskite solar modules can be integrated into building ...

Solar surged 64% in H1 2025 with 380 GW added worldwide, led by China's record pace, keeping 2025 on track for new highs.

China's National Energy Administration (NEA) says developers installed 252.87 GW of new PV capacity from January to October 2024, including 12.6 GW in October alone.
