

EVE 3.2V LiFePO4 batteries (105Ah-314Ah) are lithium iron phosphate cells designed for high-capacity energy storage. With exceptional cycle life (4,000-8,000 cycles), thermal stability, and ...

After 24 years of rapid development, EVE is now a global lithium battery company which possesses core technologies and solutions for consumer batteries, power batteries and energy storage batteries.

Have questions?? Get help from a EVE expert.

Intelligent factories, highly automated production lines and high-precision equipment to maintain battery consistency. Over 2856 cell manufacturing control points, with perfect design process and testing system. ...

ICR, INR, NMC, LFP, primary, rechargeable, lithium ion, lithium ion phosphate, lithium manganese dioxide, lithium thionyl chloride, CR, ER, SPC, PLM module, battery, pack, rack, system, PCB, PCBA, PCM, BMS, ...

Build an energy storage lithium battery platform to help achieve carbon neutrality.

Provide a comprehensive product solution for multiple application scenarios such as telecom base station backup battery pack and data center backup battery pack, which is convenient and economical and noise-free.

Joining Hands with National Innovation Platform, EVE Energy's Large-Capacity Energy Storage Batteries Play Key Role in Core Greater Bay Area Demonstration Project

Supplier highlights: This supplier is both a manufacturer and trader, with main sales in Germany, Estonia, and Brazil. They offer overseas warehouse services, full customization, design customization, and sample ...
