

Does North Korea have an EV?

Say Hello To North Korea's First EV. It's Not What It Seems Enter the Madusan EV, which claims 450 miles of range--better than any of Tesla's current EVs. Let's unpack that. North Korea is notorious for its authoritarianism, hatred of Western nations and closed borders that make it nearly impossible to get anything in or out of the country.

Is a North Korean electric car a rebadged BYD Han?

Recently circulating on Weibo is a video of a North Korean electric car. However, the car is actually a rebadged BYD Han. Despite the video referring to the car as the Madusan various aspects give the game away. The video gives the range of the cars as 720 km and the dragon face and Chinese knot tail lights show the car is a Han.

Is this EV a 'BYD Han' driving around empty streets in North Korea?

Of course, Madusan says the EV (which is unnamed at the moment) is a result of its funding. However, we can't help but think that it's essentially a BYD Han driving around empty streets of what we assume is North Korea. It's rather amusing that the car makes engine sounds too...and that it was making tire squealing sounds on wet pavement.

Did a North Korean electric vehicle appear on YouTube?

According to media reports on June 17, an electric vehicle with a North Korean brand appeared on the YouTube channel KANCCTV, which recently introduced North Korea-related videos. The Madusan Economic Federation was introduced through this channel, and the electric vehicle the company would sell appeared for about 30 seconds.
