

2024 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a base year of 2022. The Base Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance ...

India's renewable energy industry is urging the government to use Union Budget 2026 to unlock stalled projects, lower financing costs, and accelerate domestic manufacturing across solar,...

A new analysis from energy think tank Ember shows that utility-scale battery storage costs have fallen to \$65 per megawatt-hour (MWh) as of October 2025 in markets outside China and ...

Batteries are getting cheaper and allowing solar power to be used beyond daylight hours, according to new analysis from clean energy think tank Ember.

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and soaring ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

This year, we introduce a new PV and storage cost modeling approach. The PV System Cost Model (PVSCM) was developed by SETO and NREL to make the cost benchmarks simpler and more ...

Discover pricing trends, supplier risks, and contract strategies to help you purchase smarter, negotiate effectively, and strengthen your PV projects. Get your ticket.

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress towards goals and ...

The latest draft proposal to emerge from the Senate Finance Committee, which focused on areas relating to taxation, appeared to preserve the ITC for energy storage but end it abruptly for ...
