

How secure is Malta's energy supply?

The security of Malta's energy supply is a key area of focus for us. Being a small island, Malta has a small electricity supply system and only a single electricity supplier (Enemalta plc) and depends heavily on imported energy sources. Malta also has no natural gas pipeline interconnection with neighbouring countries.

Does Malta have a natural gas pipeline?

Malta also has no natural gas pipeline interconnection with neighbouring countries. Notwithstanding Malta's spatial and infrastructural limitations, the Energy & Water Agency aims to maximise the country's use of renewable energy sources.

What components make up the price of electricity in Malta?

main price components (energy, network, taxes/levies) In Malta, there are four components making up the price of electricity for household and non-households energy and supply, network costs, excise tax and VAT. These figures are published by the Eurostat on a

Should Malta diversify its energy supply?

e of intermittent renewables in Malta's energy mix. Having said this, Malta deems it crucial to diversify sources of electricity supply, including onshore backup facilities, to mitigate risks associated with potential failure to its electricity interconnection with Sicily, also in view of the fact that damages to su
