

EVE Energy showcased its comprehensive portfolio of full-scenario energy storage solutions, systematically presenting the latest advancements in large battery technology--from ...

The recent energization of the Lingshou 200MW/400MWh standalone energy storage project, a collaboration between EVE Energy and State Grid Power Technology, exemplifies the ...

EVE Energy impressed at EESA 2025 with large-cell tech, 5MWh+ systems, and C& I solutions, earning two major industry awards for innovation and supply excellence.

At IAA Mobility 2025 in Munich, EVE Energy showcased its most important innovations in the field of energy storage.

EVE Energy has set a new industry milestone, with the world's first 400MWh energy storage project using 628Ah ultra-large cells successfully connected to the grid at Phase II of the ...

The world's first 400MWh energy storage project using 628Ah ultra-large cells has been successfully connected to the grid at Phase II of the Ruite New Energy Project in Lingshou, Hebei, ...

China's EVE Energy recently presented a 6.9 MWh battery energy storage system integrating its 628 Ah cells and announced its 2025 half-year results.

EVE Energy activated a 200 MW/400 MWh standalone storage system in Hebei with the world's first 628 Ah ultra-large cells, enhancing energy density, cutting lifecycle costs and supporting ...

EVE Energy, a pioneer in big-battery technology, has reached a major milestone in the energy storage industry by successfully connecting the world's first 400MWh energy storage project ...
