

Finland energy storage battery project construction

Is this Finland's largest battery energy storage system?

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's largest and one of the Nordics' largest battery energy storage systems (BESS). The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland.

How will a new battery energy storage system help the Finnish grid?

After the start of commercial operations in 2026, the project will contribute an important balancing function to the Finnish grid, supporting the Finnish renewable energy expansion. The groundbreaking ceremony took place in the afternoon on Monday the 26th of May on the site near Nivala where the battery energy storage system will be built.

Is Ingrid developing a battery energy storage system?

Ingrid is developing the battery energy storage system (BESS) project in partnership with investor SEB Nordic Energy portfolio company Locus Energy for a commercial operation date (COD) in 2026. The firm said it the project in Nivala, in the Northern Ostrobothnia region of Finland, is the largest ready-to-build (RTB) BESS in Finland.

Are energy storage systems a solution to Finland's energy transition?

Energy storage systems offer a solution. "This groundbreaking is an important moment for Finland's energy transition and a concrete step toward a more flexible, resilient, and decarbonized energy system," said Jussi Jyrinsalo, Senior Vice President at Ingrid.

The project follows the launch of Winda's first energy storage initiative, a 30-MW/60-MWh development in Rautavaara, launched last summer. Construction of the Jamsa battery storage ...

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's largest battery energy storage system ...

The first project, currently under construction, consists of 13 new grid scale battery energy storage systems across the south of Sweden, and is planned to add an additional 196 MW of ...

Finland's authorization of its largest battery-storage project marks a pivotal point in the renewable energy landscape. As energy stakeholders anticipate the completion of the Nivala-based ...

Ingrid is developing the battery energy storage system (BESS) project in partnership with investor SEB Nordic Energy portfolio company Locus Energy for a commercial operation date (COD) ...

The first project, currently under construction, consists of 13 new grid scale battery energy storage systems across the south of Sweden, and is ...

Finland energy storage battery project construction

Nala Renewables begins construction of 50MW/100MWh BESS storage project in Finland with Sungrow and KSBR London, 11 November 2025 - Nala Renewables, a global power ...

Finnish utility Helen is launching a Battery Energy Storage System (BESS) project in Nurmijärvi, southern Finland. Scheduled for commercial operation in 2025, the 40 MW BESS will be ...

Ingrid is developing the battery energy storage system (BESS) project in partnership with investor SEB Nordic Energy portfolio company Locus Energy for a commercial operation date (COD) in 2026. The ...

The first project, currently under construction, consists of 13 new grid-level battery energy storage facilities in southern Sweden. The project aims to add a total of 196 megawatts of ...

Swedish flexible assets developer and optimizer Ingrid Capacity has joined hands with SEB Nordic Energy's portfolio company Locus Energy to develop what is claimed to be Finland's ...
