

Georgia Power's 2025 Integrated Resource Plan (IRP) has ignited a critical debate about the role of fossil fuels in a rapidly decarbonizing energy sector. While the utility positions its continued ...

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs. The ...

Georgia Power has initiated the construction of a 200MW (megawatt) battery energy storage system (BESS) in Twiggs County, southeast of Macon in the US state. The project, ...

Georgia Power has started construction on a new standalone battery storage system, a 200 MW project in Twiggs County, Georgia. This project marks a significant milestone in Georgia ...

Driven by economic growth and evolving grid requirements, Georgia's energy storage sector presents an opportunity worth evaluating. For developers, financiers, and the engineering, ...

In this article, written by Allan Oduor, Associate Project Manager at Enertis Applus+, the author examines Georgia's rapid development of utility-scale energy storage, outlining the state's ...

Georgia Power launches a 500 MW tender for battery energy storage systems, driving major growth in renewables integration and grid reliability.

Georgia Power has commenced construction on 765 megawatts (MW) of new battery energy storage systems (BESS) across four counties in Georgia, aiming to significantly enhance grid ...

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.
