

Global share of lithium batteries for energy storage

Looking forward, IMARC Group estimates the market to reach USD 140.51 Billion by 2033, exhibiting a CAGR of 11.14% during 2025-2033. Asia-Pacific currently dominates the market, holding a significant ...

Lithium-ion batteries are ideal rechargeable battery used in EVs, renewable energy storage. Increasing transition towards green energy is driving market growth. Global renewable energy generation ...

The energy storage segment held a significant share of the lithium-ion battery market in 2024, as demand for reliable and scalable storage solutions continues to grow alongside renewable energy ...

Key developments include the rise of solid-state batteries, which offer higher energy density, increased safety, and faster charging times compared to traditional lithium-ion batteries.

EVs predominantly rely on lithium-ion batteries for power and accounted for over 80 percent of the global lithium-ion batteries demand in 2024. Find up-to-date statistics and facts on...

The Asia Pacific is the holding the majority lithium-ion battery energy storage market share. Asia Pacific countries, especially China, India, Japan, South Korea, and Australia, are leading ...

"The global lithium-ion battery market is rapidly growing as demand for electric vehicles, smartphones, and renewable energy storage increases. These powerful, rechargeable batteries are ...

Asia Pacific lithium-ion battery market held the largest share of 47.7% of the global market in 2025. The lithium-ion battery market in the U.S. is expected to grow significantly over the forecast period. By ...

Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for electricity access, adding a total of 42 GW of battery storage capacity globally.

With continued advancements, lithium-ion batteries will remain a cornerstone of the global energy transition, requiring collaborative efforts among researchers, industry stakeholders, and ...
