

The Greek Ministry of Energy and Infrastructure has increased its target for a merchant standalone battery energy storage system (BESS) rollout to 3.55 GW against the background of rising...

Two new photovoltaic parks are currently (August 2024) under construction in Western Macedonia with a total capacity of 1,000MW. This new energy project is carried out by Greece's Public Power Corporation in a joint venture with RWE Renewables Europe & Australia. Both of these parks are expected to commence operations in 2025. In addition, a new photovoltaic park in Thessaly of a total capacity of 390MW is under design (as of August 2024)

However, challenges such as fragmented charging infrastructure, regional disparities, and poor user experiences threaten progress. This report draws on P3's cross-country EV testing, policy analysis, ...

Charging.gr is a high quality, public, free, open database of electric vehicle (EV) charging stations throughout Greece and Cyprus.

Without batteries or pumped hydro plants capable of absorbing excess solar output at midday and releasing it during evening peaks, curtailments will only grow. Policymakers have ...

During sunny days, PV contributes over 60%-70% of energy during midday. Considering that there is no storage available yet in Greece, it is only reasonable that we have these levels of...

This new energy project is carried out by Greece's Public Power Corporation in a joint venture with RWE Renewables Europe & Australia. [10] Both of these parks are expected to ...

Summary: Explore how Athens is leading the charge in electric vehicle (EV) energy storage innovation. This article dives into the technology, applications, and data-driven benefits of integrated EV storage ...

For the Cyclades Islands without grid coverage, an independent charging station with photovoltaic roof (250kW) + liquid flow battery energy storage (1MWh) is built.

Greece is rapidly emerging as a Southeast European energy hub, driven by rising renewables, stronger interconnections, and growing flexibility and grid investments.

Greece is entering a new phase in its clean energy transition. After years of leading southern Europe in solar power expansion, the country is now shifting its focus to energy storage, a ...
