

Grenada's new hydrogen energy small container station

The Hydrogen Smart Container is a hydrogen refuelling system housed in a 20 foot container. The HSC can be set up as either a 35 MPa (350 bar) or 70 MPa (700 bar) H2 refuelling station.

Grenada has launched the "Build Back Better" project in Petite Martinique to rebuild homes with storm-resistant structures, following the devastation caused by Hurricane Beryl in July.

This profile provides a snapshot of the energy landscape of Grenada--a small island nation consisting of the island of Grenada and six smaller islands in the southeastern Caribbean Sea--three of which are ...

The collaboration between the Government of Grenada, Seabased Ltd., and SIDS DOCK sets a precedent for other island nations to explore and invest in wave energy as a viable component ...

Grenada's energy storage initiatives are shaping the future of sustainable power in the Caribbean. This article explores the strategic locations of these projects, their applications in renewable energy ...

The PURC launched its pilot SSIPP programme in 2021, allowing for investments in the renewable energy space. This programme sought greater penetration of green energy into ...

Swedish wave energy company Seabased has signed a memorandum of understanding (MoU) with the Government of Grenada and SIDS DOCK to establish Grenada's first utility-scale ...

The project is designed to generate clean, predictable wave energy, reducing Grenada's dependency on imported fossil fuels while providing potential pathways for green hydrogen ...

Closer to home, the world's largest green hydrogen power plant has broken ground in French Guiana with similar projects to launch in Barbados. With Grenada slowly transitioning to increase renewable ...

New modular designs enable capacity expansion through simple container additions at just \$210/kWh for incremental capacity. These innovations have improved ROI significantly, with commercial projects ...
