

Recently, Huasheng New Energy Technology Co., Ltd. successfully completed the full delivery of the 1.8GW heterojunction photovoltaic module project, setting another GW-level delivery ...

On August 15, Yunnan Energy Investment issued an announcement on the investment of Huize Yunneng Clean Energy Co., Ltd. in the construction of Pigadachangqing Photovoltaic Power ...

The outstanding performance in the Longtan photovoltaic project in the Lancang River Basin once again confirms the leading advantages of Huasheng heterojunction modules in efficient power generation ...

This test compares the power generation performance of two 1MW photovoltaic power stations located in Boston (temperate climate zone, dip angle is 0 °) and Las Vegas (Desert climate ...

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global ...

Through continuous exploration, they achieved breakthroughs in photovoltaic technology development on red mud stockpiles. The Institute's distributed photovoltaic design rapidly expands ...

The core technology of Huasheng New Energy is heterojunction (HJT), and its biggest feature is the use of double-sided microcrystalline technology.

HJT's strengths lie in its high power and bifacial efficiency. Currently, Huasheng New Energy's mainstream HJT components have a power output of around 730W, which is 10W to 20W ...

Our n-type heterojunction solar panels, with annual capacity of 20 GW, offer unmatched efficiency, reliability, and the lowest carbon footprint.

According to a recent article titled "HJT or TOPCon, It's a Question", Chairman Qu Xiaohua of Canadian Solar, HJT's power generation is 2% higher than that of TOPCon, based on a ...
