

Are battery energy storage systems the future of energy in India?

Harsh Shah, Managing Director, IndiGrid, said, "Battery Energy Storage Systems are central to the future of energy in India. They bridge the intermittency of renewables, reduce fossil fuel dependency, and unlock flexible, reliable power delivery."

How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8 GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219 MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

Does India need energy storage?

o Significant Energy Storage Needed for Grid Stability: India will need 61 GW/218 GWh of energy storage by 2030 and 97 GW/362 GWh by 2032 to ensure grid reliability. Battery storage will lead, though pumped hydro may gain ground if battery prices do not fall as anticipated.

How is India advancing energy storage solutions?

At the heart of this momentum is the strategic push by the Government of India and various state authorities, backed by institutions like SECI, NTPC, and SJVN, to advance energy storage solutions. A landmark initiative includes the approval of Viability Gap Funding for 13,200 MWh of battery energy storage systems by 2030-31.

Battery Energy Storage System is Crucial for India's Energy Transition The emergence of Battery Energy Storage Systems highlights the need for adaptability and long-term thinking in ...

Market Acceleration: Solar + Storage + Hybrid Push If 2023 and 2024 were about policy foundation, then 2025 is the year of deployment. India's renewable market has entered a decisive ...

Explore the future of energy storage in India, from lithium batteries and solar power to EV growth and reliable backup solutions.

Learn how batteries support solar and wind power in India through energy storage, backup, and grid reliability to accelerate the clean energy transition.

Utility-scale battery storage is emerging as a critical solution to address grid stability challenges, including peak load management and dispatch reliability, while enabling greater ...

At the heart of this momentum is the strategic push by the Government of India and various state authorities, backed by institutions like SECI, NTPC, and SJVN, to advance energy ...

The government can also encourage RE + BESS contracts for Corporate PPAs to expedite energy storage

deployment and increase the share of renewable energy. Unlocking India's ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects. Government ...

India's ACC battery demand set to surge to 700 GWh by 2045, led by LFP batteries, supporting EV growth and a self-reliant energy storage ecosystem.

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to ...
