

Is it better to invest in photovoltaic panels yourself or to rent them

Should you lease or buy solar panels?

If your local electrical grid provides affordable energy at a lower cost than your solar panel lease, leasing may not be your best option. Similarly, consider whether you can make up the cost of your solar panel purchase with energy savings if you decide to buy the system outright. [How to Decide: Is Leasing or Buying Solar Panels Right for You?](#)

Should you buy or pay cash for solar panels?

In terms of long-term savings, paying cash for solar panels provides a greater potential return on investment. However, solar loans are quite common, and there is still plenty of energy savings to be had for homeowners who finance their solar system. [Is it better to lease or buy solar panels?](#)

Are solar panels a good option when selling a home?

Of course, the specific details of your solar lease agreement will play a big role in how this plays out. Some leases are more transferable than others, and some have provisions that make the process smoother. But in general, owned solar panels provide more flexibility and upside when it comes time to sell your home.

What is the difference between buying and leasing solar panels?

There are three major differences between buying and leasing solar panels: If you purchase a solar system, either with cash or a loan, you own the system and receive 100% of the benefits that come with it.
