

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Can you buy solar panels yourself?

While it is possible for homeowners to buy solar panels themselves, either used or directly from the manufacturer, there are a few reasons to buy them through an installer. Design a custom solar system and compare quotes online. The back way into buying solar panels is buying a house that already has solar panels installed.

Are solar panels worth it?

In these cases, you might need to get approval from your council's building control team, so check with your local authority. As it typically takes about 10 years to recoup your installation costs, if you're considering moving, solar panels probably aren't worth it (though it can push up the value of your home).

Are solar panels a good investment?

Pros: The energy produced by your solar system is free, and if your utility uses net metering, it credits you for any excess electricity that is added to the grid, helping you to break even more quickly on the project's cost. You may be able to get a loan to help pay for the costs of installing solar panels.
