Are 'deep-tech-based' technology solutions the future of Israel?

(Gavriel Fiske/Times of Israel) Bar-Ilan University President Prof. Arie Zaban, an energy researcher and entrepreneur, said "deep-tech-based" technological solutions were critical for the planet's future and that the institute would "help position the State of Israel as an ecosystem in the field of climatech."

Why is storage important?

Much of the world is transitioning from fossil fuels that contribute to climate change to more sustainable sources of energy, such as solar and wind. Storage is critical given that these sources of power are often not available at all times. For example, there is no solar energy when the sun doesn't shine.

How much money does Israel spend on a new research institute?
