

# Italian energy storage battery wholesale price

Does Italy have a battery storage market?

Italy has both a rapidly growing utility-scale market as well as a flourishing customer-sited battery storage market. Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives.

Will Italy achieve 30-40 GW of battery storage capacity by 2050?

By 2050, Italy aims to achieve 30-40 GW of storage capacity. There are significant regional differences in the adoption of battery storage systems across the country. While most distributed battery adoption is occurring in the north, most of the larger-scale storage projects are in the south and on Italy's largest island, Sardinia.

Why is Customer-Sited storage so popular in Italy?

Customer-sited storage adoption has been mainly driven by a combination of high electricity prices and generous tax incentives. For utility-scale systems, Italy has established favourable electricity market rules that enable projects to earn revenues from a range of different sources.

Why are electricity prices so high in Italy?

Italy's high electricity market prices are largely driven by its heavy reliance on fossil gas for power generation. In Italy, the government and the Italian TSO (Terna) have developed several electricity market products where storage projects are able to compete and provide services to the power system.
