

On behalf of the German Federal Government, KfW is supporting the construction of a large photovoltaic system with an installed capacity of up to 100 MW to promote decarbonisation. It will contribute to significantly ...

Discover how Kosovo's groundbreaking energy storage project is revolutionizing renewable energy adoption while addressing grid stability challenges.

Known as Solar4Kosovo, this new solar plant is a key component of the EU's strategy to help Kosovo expand its renewable energy capacity and reduce its reliance on coal power.

As part of the EU's global energy transition initiative, Kosovo is set to host one of the largest solar photovoltaic power plants in the region, supported by combined funding from the European Investment Bank (EIB), KfW ...

While the increase of the solar PV installed capacity limitation marks a crucial step in the evolution of solar energy utilization in Kosovo, it is still insufficient, especially for industrial and large ...

Kosovo is significantly advancing its solar energy sector, with expectations to add 100 MW of new solar capacity by the end of 2025. This expansion will be driven by the introduction of larger-scale ...

This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW.

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic plant in Kosovo and ...

To support the green transition in Kosovo*, the European Investment Bank (EIB) has signed a EUR33 million investment loan for the construction one of its largest solar photovoltaic plants near Pristina - with ...
