

The EDP Group, Lisbon, Portugal, has strengthened its commitment to decarbonization by launching two units that will exploit the potential of green hydrogen and energy storage systems.

As renewable energy adoption accelerates globally, Lisbon emerges as a strategic hub for innovative containerized energy storage systems. This article explores how modular energy storage solutions ...

JinkoSolar, the global leading PV and ESS supplier, has successfully commissioned a 5.24MW / 15MWh battery energy storage system, forming an integral part of ...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ ...

This article ranks the top 10 energy storage companies in Portugal, with a particular emphasis on the most active developers and solution providers who are advancing the country's ...

The 48 battery containers planned at the project, which Hyperion submitted to the DGEG in 2019, would each contain 5,015 kWh of the same Sungrow products. The developer secured grid ...

These will be Hyperion's first hybrid (solar + storage) projects and among the first of their kind to move into implementation in the Iberian Peninsula, positioning both the company and the ...

MeterBoost is a Portuguese manufacturer that specializes in innovative Lithium energy solutions, particularly for solar energy storage. Their products allow users to maximize solar investments ...

Why the Lisbon Project Matters (and Why You Should Care) Lisbon's iconic yellow trams zipping through streets powered entirely by stored solar energy. While we're not quite there yet, the ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy's value.
