

Marseille power generation equipment container house

How does the port of Marseille use photovoltaic energy?

In parallel, the Port of Marseille Fos is working to develop photovoltaic energy production by equipping the roofs of hangars and warehouses. Today, the Port supplies ships with power from the national ENEDIS network. The electricity is guaranteed 100% renewable, thereby ensuring the maximum environmental benefit.

What does the port of Marseille Fos do?

For several years now, the Port of Marseille Fos has undertaken a series of concrete actions that address air quality and the energy transition. It encourages and assists ship owners to comply with the regulations in force on fuels designed to reduce polluting emissions.

How does the port of Marseille Fos protect biodiversity?

Since 2007, the Port of Marseille Fos has committed to a policy of preserving biodiversity through the management and protection of its natural areas covering over nearly a third of its territory in the west of the port area.

What does the charter say about the future of Marseille?

The Charter calls on all the signatories to mobilize on a reciprocal and long-term basis with a shared vision of the future of the port: the Port opens up to the city while the territory supports the development of the Marseille harbours.
