

A microgrid (MG) is an independent energy system catering to a specific area, such as a college campus, hospital complex, business center, or neighbourhood (Alsharif, 2017a, Venkatesan et ...

This review article (1) explains what a microgrid is, and (2) provides a multi-disciplinary portrait of today's microgrid drivers, real-world applications, challenges, and future prospects

The project will promote adoption of microgrid technology for the Department of Defense through implementation of the Energy Surety Microgrid(TM) design process that focuses on: Energy ...

This paper presents a systematic literature review encompassing recent advancements in MG technology. It delves into MG architecture, diverse control objectives, associated ...

The work began in 2008 as a project to install a high-efficiency, 100% renewable energy-powered, single-building microgrid. Since then, the project has expanded into an installation-wide ...

This paper presents a review of the microgrid concept, classification and control strategies. Besides, various prospective issues and challenges of microgrid implementation are ...

various SR technologies suitable for different microgrid applications. It articulates a path forward for technoeconomic studies of SR in microgrids and the selection of SR .

Graduation report on the research and development of machine learning-based electrical usage forecaster for microgrids. Details my process of conceptualising and designing the application.

This white paper focuses on tools that support design, planning and operation of microgrids (or aggregations of microgrids) for multiple needs and stakeholders (e.g., utilities, developers, ...

From MIT to Stanford, engineering students are transforming their graduation projects into real-world solutions for renewable energy integration. Just last month, a team from TU Delft actually ...
