

To implement the second component of the project, the Ministry is now looking to hiring the qualified and experienced consultant(s) to conduct the design and installation of smart solar micro-grid in the ...

The purpose of this paper is to propose three different solutions to handle the issue of excess electricity to the MV grid from LV microgrid with PV. These scen.

Huijue Group offers industrial and commercial energy storage, PV-BESS -EV Charging, Off-grid / On-grid Microgrid, telecom site solutions, and home solar energy storage, ensuring ...

The development of microgrid technology has made significant strides in recent years, particularly in remote and challenging environments like Cambodia's floating villages.

Therefore, this research focuses on building a radial LV microgrid topology which integrates PV and batteries and proposes several solutions to handle the issue of excess electricity to the MV grid. In ...

In Cambodia, the electrification rate is only about 82% of the population in 2021 in rural areas. The objective of this work is to propose a low voltage microgrid comprehensive planning tool ...

This demonstration project focuses on two key areas of clean energy: energy efficiency (EE) in buildings and solar microgrids for rural electrification. Energy efficiency in buildings can contribute to slow ...

Thanks to Okra's new DC mesh grid microgrid network, integrating both existing distribution, local power generation and storage, and smart data software, nearly 150,000 ...

Okra is a technology developer who has created an innovative system to set up and manage solar electricity sharing in the most remote parts of the world.

Building on their experience with Okra, MME is currently evaluating the potential for a scale out of the Okra technology as an effective solution for energizing hard to reach communities throughout ...
