

# New Zealand inverter single phase inverter

Where can I buy high-quality solar inverters in New Zealand?

Shop high-quality inverters at Mainergy Limited, designed to optimize your solar energy systems in New Zealand. Discover our reliable and efficient range now.

What types of inverters are available?

These are available as: Single-phase: designed for home and small business applications. Three-phase: developed for higher yield and more suitable for commercial environments. Hybrid inverters: have the option to draw power from the grid or your energy storage system. Hybrid inverters are great during power blackouts.

What is a solar inverter?

A solar inverter converts the energy output from solar panels into a usable electricity form, to be used in your home or business. Our range includes grid-tied, hybrid and off-grid inverters. A Grid-tied Inverter is designed to connect to supplement your home or business' mains power.

What is a hybrid inverter?

The Hybrid Inverter enables you to optimise the amount of power you generate and consume, and minimise transfer of energy to/from the grid or generator power. You can increase the proportion of self-use energy generated by your solar system, from 20% to more than 80%!

The S5 single phase string inverter series offers an LCD screen where customers can view the real time performance of the system along with their monitoring portal.
