

What type of power outlet does Peru use?

Peru uses three different power outlet types. Expect to find Type A/B, which is common in North America, as well as Type C, which is the standard in most of Europe. The vast majority of Peruvian power outlets will accept either of these three types. However, a rare few outlets only take inputs from a specific region, either Type A/B or Type C.

Does Peru have a power adapter?

This Power Adapter is a great option if you want to make sure your charging devices will be compatible throughout the country of Peru. It's also compatible in dozens of countries around the world and has a built-in fuse that will protect your valuable electronics during the relatively frequent power surges experienced in Peru. How much power does Peru have?

The electrical network in Peru varies widely throughout the country. The upscale suburb of Miraflores, for example, will likely only suffer from one or two power cuts in a year. Venture out into a rural region, however, and the power becomes significantly more sporadic. Regardless of the outlet type, the entire country runs on 220V and 50Hz.

Does Peru need a voltage converter?

If you were to plug an American 110V device into a Peruvian 220Hz power socket, you'd get a few flying sparks, a whole lot of smoke, and a fried circuit board. Therefore, a voltage converter must be an obligatory accessory on a trip to Peru, right? Not so, actually.
