

This year's report concludes that renewables are the "most cost-competitive form of generation," even without subsidies. "As such, renewable energy will continue to play a key role in the...

Here's the truth: solar energy is the most cost-effective form of new electricity generation in the United States, even without subsidies. It's fast to deploy, requires no fuel, and delivers ...

Congressional Republicans passed the One Big, Beautiful Bill, which put the brakes on federal clean energy subsidies by terminating investment and production tax credits for wind and solar...

Not only does solar power receive tax subsidies, but it has also garnered sizable federal loans, particularly during the Obama-Biden administration. Solar plants are touted to operate for ...

The two renewable sources have been cheap relative to natural gas-fired power without subsidies for at least a decade. Utility-scale solar today is 84% cheaper than it was 16 years ago; ...

Despite the blow that tax credit repeal would deal to renewable energy project values, analysis from Lazard finds that solar and wind energy projects have a lower levelized cost of ...

As we consider the critical reforms in the reconciliation process, I rise today to make the case for why we must eliminate the generous federal subsidies for wind and solar energy, paid for by ...

**ENDING AMERICAN DEPENDENCE ON UNRELIABLE ENERGY SOURCES:** Today, President Donald J. Trump signed an Executive Order to eliminate subsidies for unreliable "green" ...

In a significant shift in energy policy, President Donald Trump has taken decisive action to dismantle subsidies for wind and solar power. By signing an executive order, he aims to eliminate ...

Enormous subsidies for solar and wind generation technologies are proving much more expensive than advertised. They also carry hidden costs and burdens on the grid, most recently seen ...
