

Palestinian oil platform uses 120kW collapsible containers

Why is oil and gas important in Palestine?

Palestine's Oil and Gas resources, and their derivatives as key commodities are of paramount importance to the development of the Palestinian economy. Establishing consistent and independent supply of these energy resources will ensure the development of a vibrant and innovative economy.

Is a power supply a serious impediment to Palestinian economic growth?

Insufficient power supply is a serious impediment to Palestinian economic growth. Over the next few years, infrastructure development, including upgrading the electricity network and establishing two gas-fired power plants in Jenin and Hebron in the West Bank, could be an area for growth if capital for this investment becomes available.

Why is the Palestinian economy deprived of oil & gas resources?

Due to Israel's control over these reserves, the Palestinian economy is deprived of substantial revenues from potential hydrocarbon proceeds as well as job creation opportunities that would result from the development of these reserves and the Oil and Gas sector.

Why should Palestine invest in oil & gas reserves?

The development of these reserves could additionally enable Palestine to meet its needs of Oil & Gas products in the short and medium terms. However, the Palestinian economy remains dependent on the Israel for almost all its Petroleum products consumption, leading to a staggering annual bill of around \$1.5 billion on Petroleum product imports only.
