

What is a solar panel lease?

A solar panel lease is an agreement between a homeowner and a solar leasing company. This agreement allows the homeowner to use the solar energy system for a fixed period -- typically 20 years.

Are solar panels a lease or a PPA?

Maintenance: If you choose a solar lease or PPA, the leasing company owns the solar panel system and typically offers a service program to cover any maintenance issues that arise during the lease term. On the other hand, if you take out a solar loan to purchase your system, you'll be responsible for its maintenance.

Do you need a solar panel lease?

This is where a solar panel lease can help. Solar panel leases allow homeowners to rent solar panels from a solar provider, eliminating many of the upfront costs that stand in the way of getting solar. While this seems like a straightforward agreement, there's more to a solar panel lease contract than that.

How does a solar lease work?

Under a solar lease, a third-party owner (typically a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate. Companies calculate this rate based on the estimated annual production of your solar panel system and include this rate in your contract.

Solar Panel Leasing Terms and Considerations While lease terms vary, most follow a similar structure:
Contract length: Usually 15-25 years, giving you long-term price stability. 3 Monthly ...
