

What is a self-service power bank rental system?

We are a turnkey solution provider of self-service power bank rental systems, which is a system composed of power bank sharing stations, portable chargers, mobile App, admin dashboards, and optional POS terminals. Users can scan the station QR code with the mobile App to rent a power bank and return the power bank at any station.

What is a power bank rental system?

Our power bank rental system achieves maximized rental successful ratios and ensures seamless rental experience; supports monitoring and managing devices in real-time, so as to improve asset utilization and security, and minimizes loss and operational costs.

What features should you consider when buying a portable power bank?

Pass-through charging is another feature to consider; with it, you can charge your device and a portable power bank simultaneously. That's convenient if both your phone and backup battery are running out of power.

How do I rent a power bank?

Users can scan the station QR code with the mobile App to rent a power bank and return the power bank at any station. With POS terminal integrated kiosks, users can also rent a power bank by tapping a credit card.
