

What are specialized telecommunications rack cabinets?

Specialized telecommunications rack cabinets are tailored for unique applications. Unlike standard telecom cabinets, these racks focus on providing open access and enhanced airflow. They are ideal for environments where physical protection is not a primary concern, such as secure data centers or labs.

What are equipment racks & cabinets made of?

Made from welded steel or aluminum, and coming in many stocked sizes and styles, our selection of equipment racks and cabinets will help protect and simplify the integration of your project. Designed for maximum airflow and easy installation, our racks and cabinets help your equipment run reliably for their full-service life.

What is the difference between a telecom cabinet and a rack?

Telecom racks have an open design, allowing easy access and airflow. Telecom cabinets, on the other hand, are enclosed structures that offer enhanced protection and security. You should choose telecom racks for controlled environments and cabinets for areas requiring environmental protection. Can telecom cabinets be customized?

What is a RAC power supply rack?

RAC series is a slim power supply rack that can store EIA-compliant 19-inch or 23-inch rack-mount power supplies and electronic loads in one place. In addition to its high strength feature, it has a compact design for easily installing several units within a rack at the minimum height and depth, which is the perfect solution for space utilization.
