

Can a solar roof power a home?

Install Solar Roof and power your home with a fully integrated solar and energy storage system. The glass solar tiles and steel roofing tiles look great up close and from the street, complementing your home's natural styling. Schedule a virtual consultation with a Tesla Advisor to learn more.

What is a solar battery backup system?

A solar battery backup system combines solar panels with advanced battery storage technology to capture, store, and deliver clean energy when you need it most. Unlike traditional solar installations that rely entirely on the grid, these systems provide true energy independence and reliable backup power during outages.

Can solar power be stored in a battery?

Existing solar systems typically have solar inverters, which change the DC power produced by panels to AC power that can be consumed in your home or exported onto the grid. But if you want to store that AC power in a battery, it needs to be inverted again to DC power.

Can a solar roof be used with a Powerwall?

Combine your Solar Roof with Powerwall--a home battery featuring an integrated solar inverter for increased efficiency and dependable energy storage 24/7. With the Tesla app, you can monitor your energy production in real time. Control your system from anywhere with instant alerts and remote access.

We rank the best solar batteries of 2026 and explore some things to consider when adding battery storage to a solar system.

A solar panel battery backup is an energy storage system that pairs with your solar panels on the roof to capture and store unused electricity for later use. Instead of sending excess ...
