

In the heart of the Caribbean, Santo Domingo is witnessing a green energy revolution. With solar irradiance levels reaching 5.2 kWh/m²/day and wind speeds averaging 7.4 m/s, the Dominican ...

You know how everyone's talking about solar and wind power these days? Well, here's the elephant in the room - renewable energy intermittency. The Santo Domingo Pumped Storage Power Station in ...

The 30 MW Santo Domingo de Luna wind farm consists of 9 wind turbines. It will produce 116 GWh per year, enough to supply power to 29,500 families, and avoid the annual emission of 76,000 tons of ...

They integrate solar panels, energy storage, and inverter functions into a single, lightweight unit. Ideal for outdoor enthusiasts, campers, and those in need of emergency backup power, these stations can ...

Under this grant, the Santo Domingo Tribe plans to design a photovoltaic system for the community water pump and treatment facility to offset the maximum amount of electricity extracted from the ...

As solar and wind projects multiply across Latin America, this 600MW/2400MWh giant stands as the region's largest storage facility, solving renewable energy's Achilles' heel: intermittency.

What We DoWe are a market-leading, independent power producer and service provider, delivering: wind (onshore and offshore), solar photovoltaic, storage, and electrical vehicle charging.

Akuo ambitions to further contribute to the energy transition within Dominican Republic with the development of additional projects, many of which will incorporate storage technologies. With 22 ...

Located in the heart of the Caribbean, this project addresses one of the biggest challenges in renewable energy: intermittency. But how exactly does it work, and why should businesses care? Let's dive in.

Feature highlights: This 220V Portable Mobile Digital Power Supply is designed for outdoor emergency energy storage, featuring a lithium battery with a capacity range of 252WH-756WH and power ...
