

Batteries accounted for 53.84% of the 2025 energy storage market size, anchored by LFP and growing sodium-ion volumes, while hydrogen storage is forecast to expand at a 38.50% CAGR through 2031 ...

Discover 10 new battery storage companies to watch in 2026 & find out how their solutions will impact your business!

Featured 2026 outlook Energy storage: 5 trends to look for in 2026 Regional dynamics demonstrate energy storage markets reaching maturity. Explore this evolution and our analysis of the key ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions ...

Near-term growth forecasts are equally compelling, with global energy storage installations projected to surge by 76% in 2025, reaching 69 GW/169 GWh. This accelerated growth is primarily ...

Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger utility-scale projects.

One of the largest lithium battery producers on the planet, Panasonic is the go-to company for firms that need energy storage products for EVs, grid-scale storage and other next-gen battery...

A framework for the "development, utilisation and commercialisation of energy storage systems" in the Philippines has been passed by the House of Representatives.

In this report, we highlight the top energy storage stocks to watch--curated for their exposure to the grid-scale buildout and long-duration energy storage (LDES) innovations.

Energy storage is quickly becoming the backbone of the clean energy transition. While solar panels and wind turbines generate renewable electricity, it's energy storage systems that make this power ...
