

Sofia Power Station Energy Storage Project

Sofia power station is an operating power station of at least 75-megawatts (MW) in Sofia City, Sofia, Bulgaria with multiple units, some of which are not currently operating.

AES Bulgaria will explore options for developing a combined 100 MW solar power and battery energy storage project, as well as a standalone 80 MW battery storage project near the capital Sofia to ...

Sofia 2025 Energy Storage Project Signed on July 28, 2025, in Sofia, the deal marks a major step in energy transition for Southeastern Europe, combining SUNOTEC's expertise in solar infrastructure ...

That's where the Sofia Energy Storage Projects come in - they're basically the Swiss Army knives of the renewable energy world. These grid-scale battery systems are solving one of the ...

On June 2, it was reported that International Power Supply (IPS) is set to begin operations at its new battery energy storage systems (BESS) manufacturing facility near Sofia, Bulgaria.

By the end of 2025, two large photovoltaic power plants will be built in Moldova, which will increase the total capacity of renewable energy sources by 90 MW. The Ministry of Energy noted that the solar ...

With the establishment of a large number of clean energy power stations nationwide, there is an urgent need to establish long-duration energy storage stations to absorb the excess electricity ...

IPS, headquartered in Sofia, is automating and scaling its production of battery energy storage systems (BESS). It is counting on growing demand in Europe, including the domestic market.

Coupled with energy storage, the solar power assets will provide clean energy during non-daylight hours, grid stability, and facilitate further integration of solar power in the country's energy mix.
