

Solar and wind power generation distribution map

In this interactive chart, we see the share of primary energy consumption that came from renewable technologies - the combination of hydropower, solar, wind, geothermal, wave, tidal, and modern ...

Discover, analyze and download data from ArcGIS Hub. Download in CSV, KML, Zip, GeoJSON, GeoTIFF or PNG. Find API links for GeoServices, WMS, and WFS. Analyze with charts and thematic ...

The Global Energy and Renewables Map is an interactive web map where you can explore global power plants and U.S. solar and wind projects.

NLR has developed an interactive map and geospatial data showing wind supply curves, which characterize the quantity and quality of land-based and offshore wind resources across the ...

Here, using OpenStreetMap infrastructure data, we present the first publicly available, spatially explicit, harmonised dataset describing global solar PV and wind turbine installations.

Explore solar resource data via our online geospatial tools and downloadable maps and data sets. Access our tools to explore solar geospatial data for the contiguous United States and ...

Renewable Energy Generation Renewables in The Electricity mix Hydropower Wind Energy Solar Energy Biofuels Geothermal How much of our electricity comes from renewables? In the sections above we looked at the role of renewables in the total energy mix. This includes not only electricity but also transport and heating. Electricity forms only one component of energy consumption. Since transport and heating tend to be harder to decarbonize - they are more reliant on oil and gas - r... See more on our world ind data

where you can explore global power plants and U.S. solar and wind projects.

Searching through hundreds of maps to find the one you're looking for could feel like battling a strong headwind. Luckily, these maps can be easily filtered by both region and turbine hub height (the ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

The World Bank and the International Finance Corporation, collectively The World Bank Group, have provided this Global Solar Atlas in addition to a series of global, regional and country GIS data layers ...
