

Do solar panels need a battery?

Solar panels are one part of a home energy system, but to maximize the energy they produce, you'll likely need a battery. A home battery or solar battery allows you to store energy collected by your solar panels and use it at times when the sun is not shining. Batteries also allow your home to go truly off-grid in the event of a power outage.

Which solar panel is best for home use?

This way, you can get the best price for your new system. Which type of solar panel is best for home use? Generally speaking, monocrystalline panels are the best option for home use. However, polycrystalline and thin-film panels can be good options depending on the size of the system and other factors specific to you.

Do solar panels produce more energy than a home needs?

Solar panels can produce more energy than your home needs. In that case, the extra solar energy can be sent back to the utility grid or stored in a battery system for later use. There are three main types of solar power systems: grid-tied, hybrid, and off-grid systems, which we explain in the videos below.
