

By focusing on decentralized energy sources like solar power plants, Ukraine aims to create a more resilient grid that is less susceptible to single points of failure. This strategy is ...

Since the beginning of the full-scale Russian invasion and targeted attacks on the energy sector, decentralised solar energy and residential solar panel installation securing the electricity supply have ...

Discover how solar energy is transforming lives in Ukraine--bringing light, safety, and hope to families surviving blackouts and war.

Solar power plants installed at three water and wastewater utility sites in Chortkiv, Western Ukraine, support uninterrupted water services to residents. It is the first solar energy project ...

Ukraine's solar market is booming amid blackouts. See 2025 demand drivers, payback, financing tools and risks - a guide for foreign PV investors.

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

The amount of distributed solar PV in Ukraine has grown significantly since 2019, with installations by around 70 000 households (under a fixed tariff scheme) seeking resilience and cost savings.

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.

The International Renewable Energy Agency (IRENA) is seeking a consultancy to conduct a feasibility study for a utility-scale solar plant in Ukraine, with applications due Dec. 23.
