

State Forestry Administration on wind power generation

The State Government shall take sufficient precaution while considering the location of the wind mills so as not to cause any disturbance to the migratory birds, as the turbine of the wind mills produces a ...

With the increase of the Oregon Renewable Portfolio Standard to 50 percent renewable energy by 2040, more wind projects will likely be built in the state by independent developers and utilities.

reviews the price of wind power in the U.S. and describes trends in installed wind project costs, wind turbine transaction prices, project performance, and operations and maintenance expenses.

The tables that follow list the major federal and state laws, Executive Orders, and other compliance instruments that establish permits, approvals, or consultations that may apply to the construction and ...

These voluntary Guidelines provide a structured, scientific process for addressing wildlife conservation concerns at all stages of land-based wind energy development.

Annual Report on U.S. Wind Power U.S. Department of Energy's Wind Energy Technologies Office National Wind Coordinating Committee WINDEXchange The National Wind Coordinating Committee is comprised of representatives from the utility, wind industry, environmental, consumer, regulatory, power marketer, agricultural, tribal, economic development, and state and federal government sectors to support the development of an environmentally, economically, and politically sustainable commercial market...
