

Swedish new energy building solar panel assembly research and development

The new solar cell developed at KTH offers a dual-functionality that could revolutionize energy-efficient lighting and power systems. Meanwhile, the recycling method from Chalmers ...

SOLVE is a consortium of universities and public/private sector partners performing collaborative, needs-driven research projects aiming at rapid expansion of solar energy in the ...

These seven themes focus on different aspects of the expansion of solar electricity in the Swedish energy system, from advanced technology to solar energy in combination with agricultural land and ...

We take a holistic and strategic approach to Sweden's energy transition, building the knowledge and expertise needed for long-term change. Through targeted research and innovation, ...

The Solar Electricity Research Centre Sweden (SOLVE) is an excellence centre that aims to increase the use of solar power, primarily in Sweden, by performing research and promoting ...

We address Sweden's energy challenges through world-class research and development. We know how to build friendly relations with our local communities to discuss their problems with us, offering ...

Sweden is not generally known for its solar energy potential, however installation rates continue to accelerate. This thesis will look into why that is. The goal of this paper is to map past development, ...

Our review identifies four decades of Swedish research that has largely failed to drive domestic commercialization, the rise and fall of an industry that mainly served international markets, and a ...

This project seeks to develop knowledge surrounding the applicability of solar PV systems in Swedish multi-family housing. Because this work is closely tied with real-world applicaitons, the constraints on ...

The project aims to increase the expansion of solar cells in Sweden, by identifying perceived obstacles in the construction process linked to various actors, investigate and describe their impact and ...
