

Texas's largest solar farms, upcoming projects, and their impact on grid reliability.

Texas is now the top state for utility-scale solar power generation capacity. However, developers of new solar projects face a changing operating environment, one lacking strong federal policy support but also ...

LITTLETON, Colorado, Dec 9 (Reuters) - For the first time, Texas' main power system looks set to generate more power from solar farms than coal plants during a calendar year in 2025, marking a...

Solar manufacturer T1 Energy has started building a \$400 million to \$425 million solar cell fabrication plant around 50 miles from Austin, Texas. Why it matters: The move bolsters one trend -- Texas ...

Discover how Texas leads the U.S. in solar power production, driving clean energy growth, lowering costs, and creating a sustainable future.

Here are some of the more prominent solar projects currently in development in Texas. From pre construction to nearing completion.

New solar and storage will be needed for an "all of the above" strategy to meet the state's energy demand. Texas led all states in new solar capacity installed in 2023 and 2024 and that trend should continue, barring ...

Solar power in Texas, a portion of total energy in Texas, includes utility-scale solar power plants as well as local distributed generation, mostly from rooftop photovoltaics. The western portion of the state especially has abundant open land areas, with some of the greatest solar and wind potential in the country. Development activities there are also encouraged by relatively simple permitting and significant available transmissio...

Solar power in Texas, a portion of total energy in Texas, includes utility-scale solar power plants as well as local distributed generation, mostly from rooftop photovoltaics.

Here is a map of all utility-scale solar farms in Texas. Hover over a solar farm to view information on each project like their name, capacity and construction date.

Despite the current downwards spiral in energy policy, utility-scale solar power projects continue to stream into Texas, at least for the time being. The flood could soon turn into a trickle,...
