

What is racking & mounting a solar PV system?

Racking and mounting can often be the most complicated portion of a solar PV system installation. The racking is the foundation of the system- it protects the modules, the roof and people over a lifetime that can exceed 25 years.

Should you choose a mounting rack for a solar system?

Since it is a costly investment, the choice of mounting racks should not be disregarded as a minor consideration if purchasing solar systems or mounting solar modules.

What are the different types of solar racks?

They are either mounted on ground, on roofs or on poles. In the solar market there are five basic types of mounting structures of which four are fixed-angle types (a-d) and one variable-angle type (e): a) roof mounted racks b) ground mounted racks c) top-of-pole mounted racks d) side-of-pole mounted racks e) tracking system mounted racks

How do I choose a solar panel system?

Evaluate the space available for solar panel installation. For rooftop systems, consider factors such as the size, orientation, and shading of the roof. In the case of ground-mounted systems, assess the available land area and identify potential obstructions that may affect sunlight exposure.
